### DETAILED ACTION

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Page 1 of the specification, lines 4 and 5, following the term, "*This application is a continuation of Application No. 09/832,006,*" inserted **--now Patent No. 6,666,133--**

### *Allowable Subject Matter*

Claims 2-22 are allowed.

The following is an examiner's statement of reasons for allowance: The prior of record does not disclose a second frame having a permanent arcuate opening as set forth in claims 2 and 16.

The prior art, Zacharias discloses a standing tree baler, in which an annular frame (18) is attached to an elevatable support (fig. 1). Zacharias discloses the annular frame to contain a central area for containing a tree, the central area defined by rollers (40), which are positionable about the trunk of a tree. Zacharias discloses the baler to be operable such that the annular frame can be opened to surround the base/trunk of a tree and then closed around the trunk. The elevatable support then raises the annular frame vertically such that the tree branches and limbs are compressed via the rollers of the central area and string is then displaced around the compressed tree.

Art Unit: 3725

The prior art reference Crew, discloses a standing tree baler having a first, second and third frame annular frame (20, 21, 37, 48) attached to an elevatable support (fig. 1) and a string dispenser for binding the tree. Crew teaches that all of the frames are opened and closed to encase a tree trunk within a central area of the frames (fig. 6). Both Zacharias and Crew teach the frames to have temporary openings, i.e., opened for placement of the tree trunk and then closed around the tree trunk. Neither Zacharias nor Crew disclose or fairly suggest a second annular frame with a permanent arcuate opening.

Neither the prior art of record, no any combination thereof discloses the inventions as claimed in claims 2 and 16. Accordingly claims 2, 16 and their dependents are allowable over the prior art or record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
